

# Creating a Yeoman Generator

---

**Steve Michelotti**

@smichelotti [www.stevemichelotti.com](http://www.stevemichelotti.com)

# Introduction

**Create our First Generator**

**Yeoman Base Classes**

**Public and Private Methods**

**Running Context**

# Generator Base Classes

## Yeoman Base

Base Generator

## Yeoman NamedBased

Inherits from Base

Adds “name” argument

Often use for sub-generators

# How to Make Method Private

Prefix with \_

Use instance  
method

Extend parent  
generator

# Yeoman Running Context

1. initializing
2. prompting
3. configuring
4. default
5. writing
6. conflicts
7. install
8. end

# Summary
