Introduction

Manage Configuration – Prompts

Manage Configuration – Storage API

Manage Dependencies

Generator Composability

Generator Composition

Allows a generator to run side-by-side with another generator

composeWith() parameters

namespace **options** **settings**

composeWith() Example

```
this.composeWith('common', {

    options: {

        'skip-message': true,

        'gitignore': true

    }

});
```
